

PEACOC® CHT Clamshell Hardened Terminal

Description:

GoFoton's innovative CHT offers hardened fiber terminal functionality using standard fiber drop cables and connectors – no hardened connectors required! The clamshell terminal design provides IP68 protection for each individual fiber connection while providing fast, easy, and secure access to deploy fiber networks quickly and proficiently. CHT offers a compact design to fit into small spaces for any OSP or ISP environment and is available in 4-port and 8-port versions with a variety of mounting options and cable stub lengths for applications in FTTx, Wireless, and other fiber networks. It's reliable high-density, hardened connectivity – **that works!**

Benefits:

- Reduces the need for splicing in the OSP environment
- Eliminates dependence on hardened connectors
- Shortens lead-times with standard universal drop cables and connectors
- Diversifies supply chain using standard fiber cables
- Simplifies inventory management
- Deploys in a broad applications space across any OSP, 5G and FTTx network

Features:

- Hardened connectivity using standard LC, SC, and MPO fiber connectors
- Compatible with any standard universal drop cable
- Isolated individual connector ports, each in a dedicated IP68 chamber with reliable clasp latching
- Compact 4-Port and 8-Port configurations
- Pole, Wall, Pedestal, Manhole, Handhole and Strand mountable
- Variety of input fiber stub lengths
- Compliant with GR-771 and IEC 60529 (IP68 to 3 meters)

Applications:

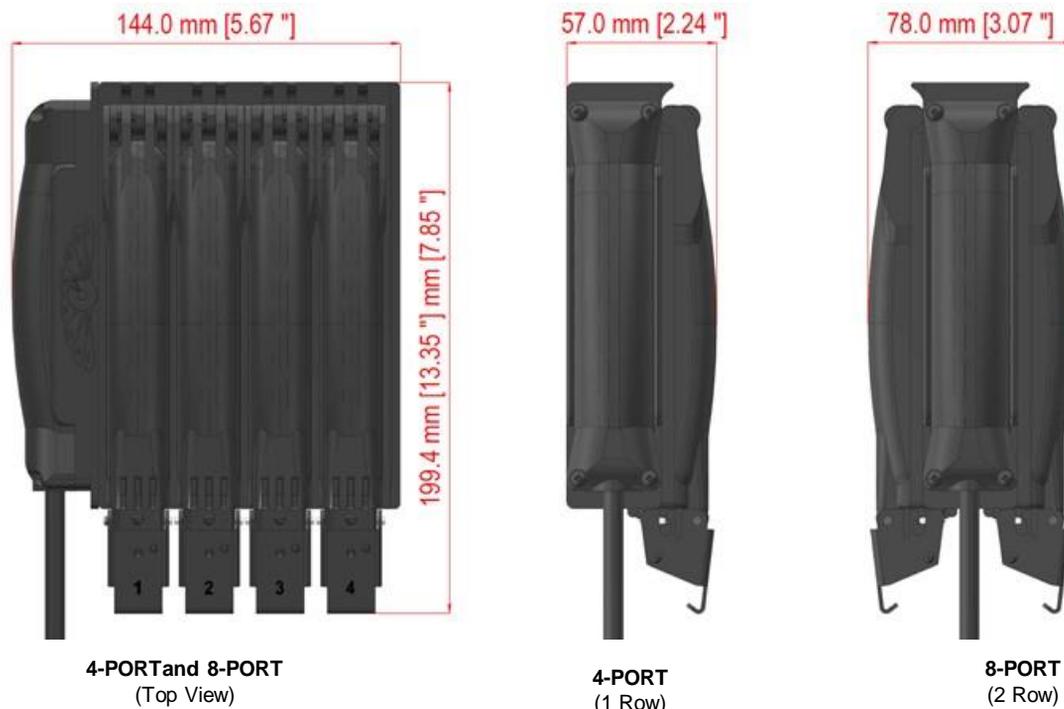

- Telecommunications & Data Communications networks
- Ideal for 5G, Small Cell, Rural, and DAS Networks
- FTTH, FTTA and MDUs
- External or Concealed within Pole Mounting
